

FASTER TURNAROUND & SUPERIOR RESULTS

Abbott Pathology

Fast results. Fresh thinking.

PCR Lab Expansion

Abbott Pathology now offers faecal PCR testing in-house, ensuring superior sensitivity, specificity and reduced turnaround times while testing for a comprehensive range of common bacteria and parasites. By delivering those tests locally, we now provide quicker access to patient results on an increased range of tests.

Requesting Faecal PCR Tests

Request **Faecal PCR*** for:

- Entamoeba histolytica
- Dientamoeba fragilis
- Giardia intestinalis
- Cryptosporidium
- Blastocystis hominis
- Campylobacter
- Yersinia enterocolitica
- Shigella
- Salmonella
- Aeromonas

**It is highly recommended that both MC&S and PCR be requested for optimal detection of enteric pathogens causing gastroenteritis.*
